

Universidad Escuela Colombiana de Ingeniería Julio Garavito Arquitectura Computacional y Sistemas Operativos Plataforma

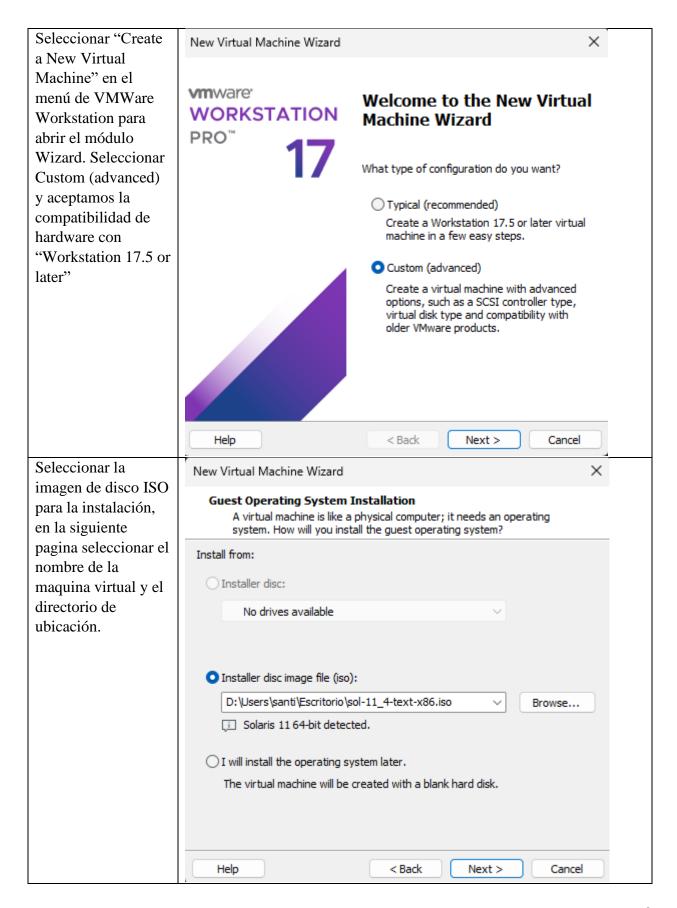

Objetivos

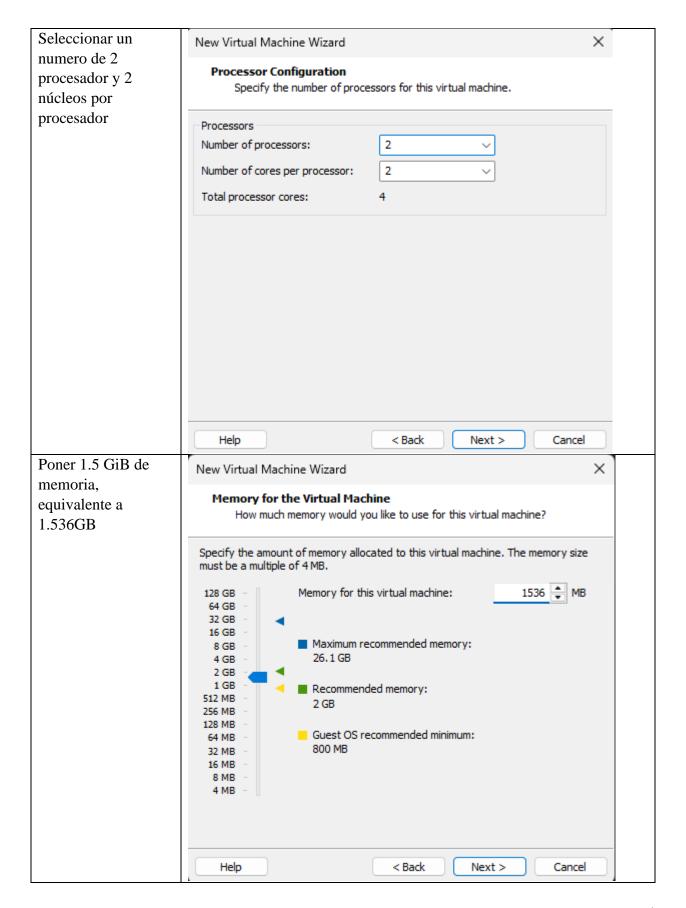

- 1. Familiarizar al estudiante con el software de virtualización VMware Workstation
- 2. Familiarizar al estudiante con la instalación de Solaris.

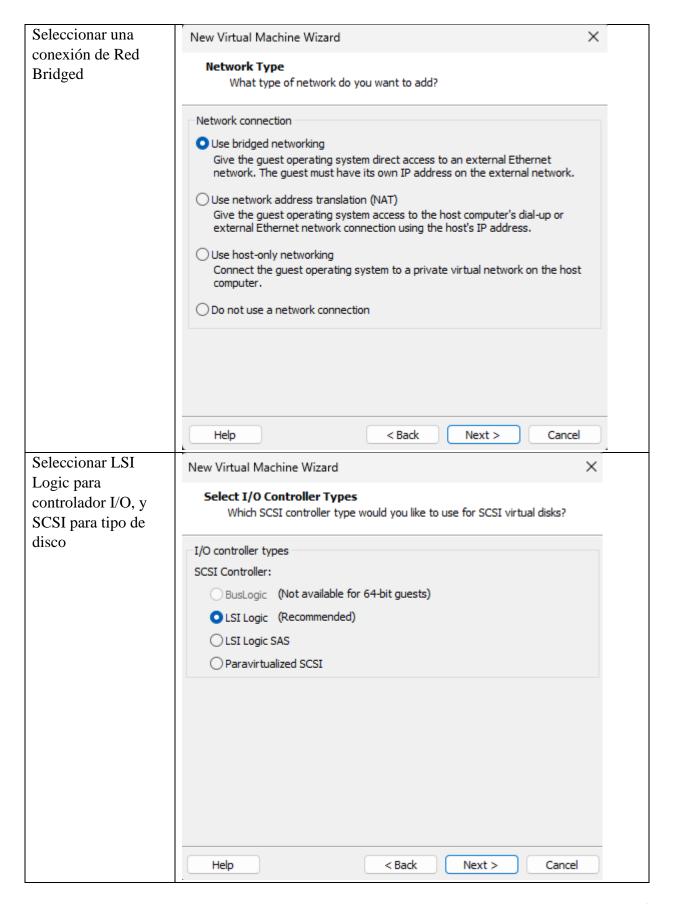

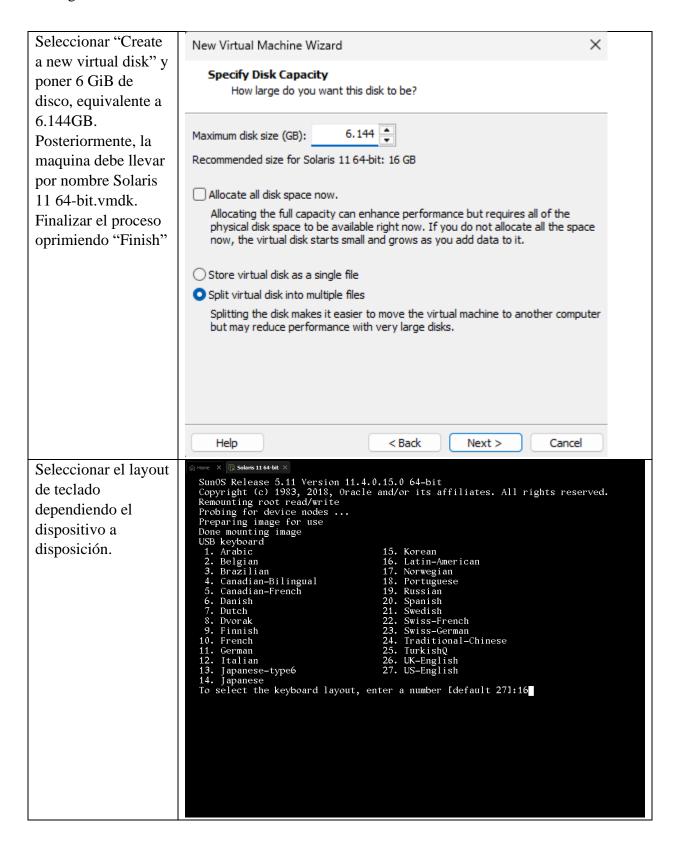

Santiago Botero Garcia. Plataforma: Solaris

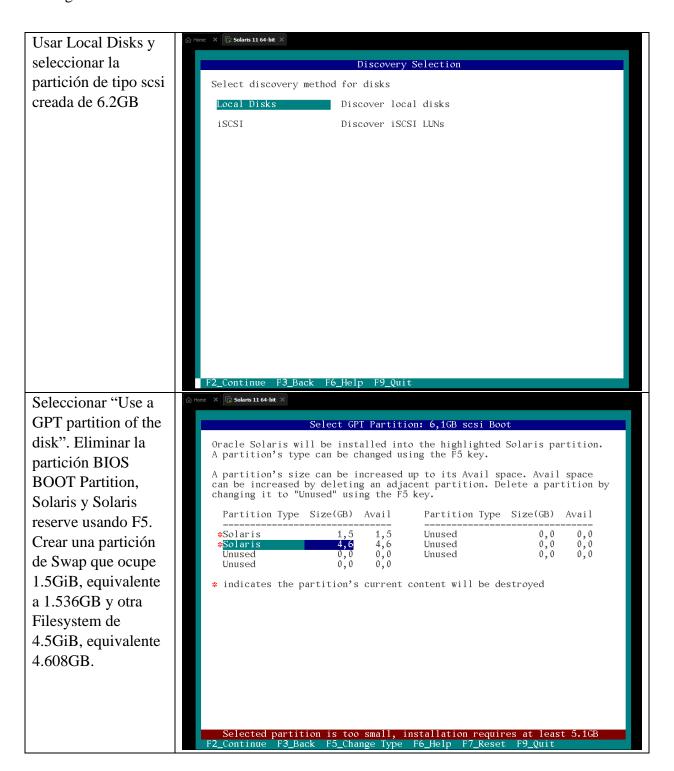

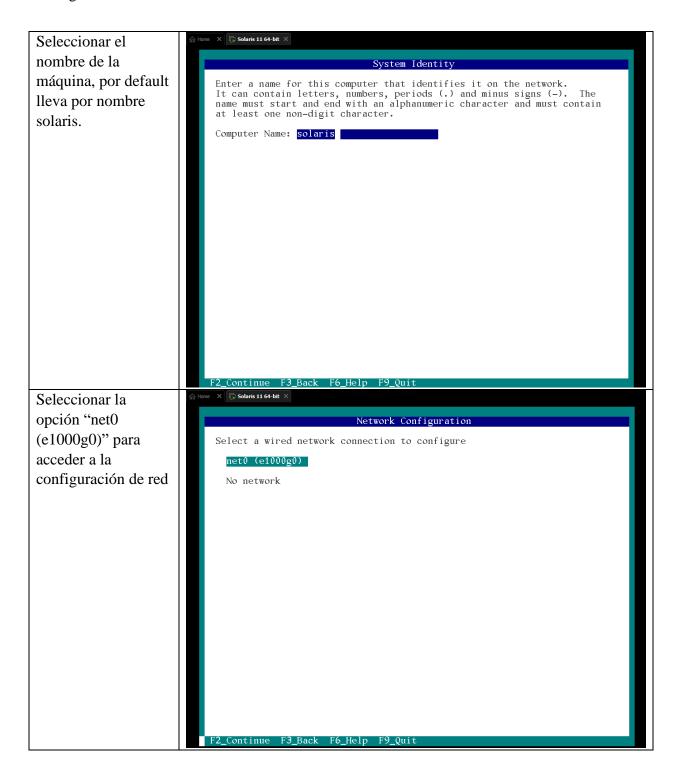

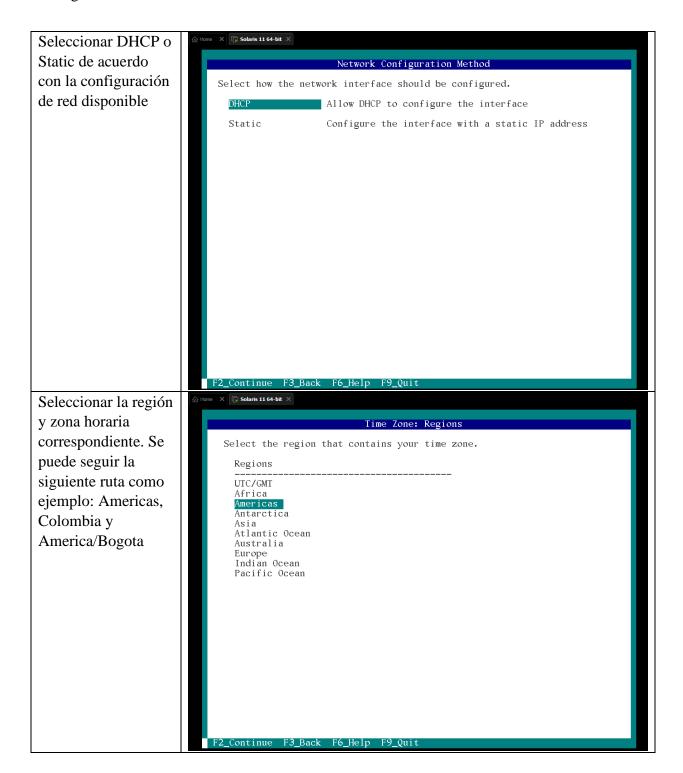

```

Verificar el funcionamiento de la conexión de red escribiendo las siguientes 3 pruebas en consola: - ping [GATEWAY]

- ping -s [GATEWAY]

- ping 8.8.8.8

- ping -s 8.8.8.8
- ping

www.google.com

- ping -s

www.google.com

Cuando el comando ping funciona correctamente, devuelve el mensaje:

 <IP o dominio> is alive

Si se usa la opción -s, mostrará la transmisión de paquetes en detalle, indicando el tamaño de los paquetes enviados y los tiempos de respuesta.

```
